

# MicroSetNCure

by MicroGlass

## Liquid Admix for Plaster, Quartz, Pebble, & Polished Finishes

Where Science Meets Experience  
for Superior Pool Finishes

### BENEFITS FOR PLASTER APPLICATORS

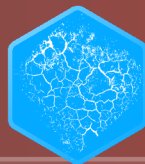

#### COLOR

Enhance pigment distribution for more consistent color with less mottling.

#### TIME

Ready-to-use liquid that enhances pumpability, workability, compaction, & exposure.

#### CRACKING

Curing Agent that reduces check cracks (crazing, eggshelling, shrink & spider cracks).

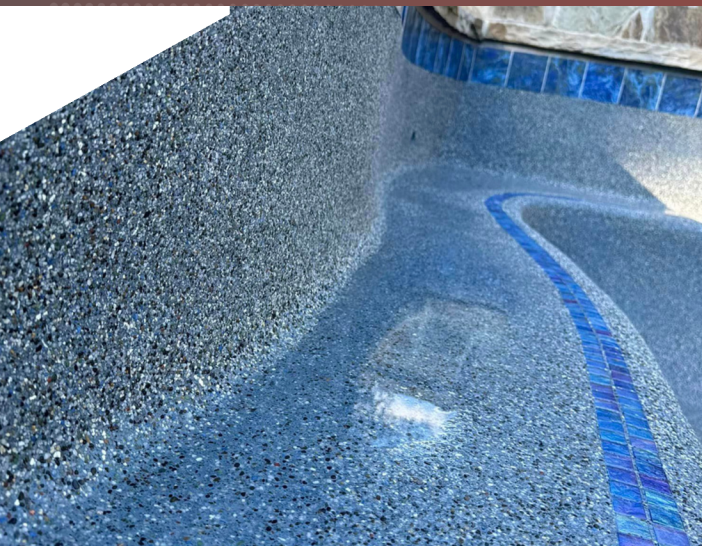

#### STARTUP PROTECTION

Protects finish from pH spikes, calcium leaching & water chemistry during startup.

#### DURABILITY

Helps defend white & colored finishes against damaging acids, salts, & chlorine.

### Why Plaster Applicators Rely On SetNCure:

Helps achieve more consistent results with plaster, quartz, pebble & polished finishes.

Applicators consistently report reduced call-backs & redos when using MicroSetNCure in their mix.
